Learning and living languages

Presenters: Mrs. Lina Kolaki

Mrs. Elham Zayat

Mrs. Nachida Tizani

In this work shop the presenters talked about a local language immersion camp to maximize students opportunities and for the students to acquire language through using it for longer hours within the day.

The presenters display a slide show for the camps which was in Arabic to express their idea and experiences to the audience. Through the slide show many of these ideas about applying the cultural games and communicative activities which attract the attention of the audience. This led to a discussion including questions and personal opinions. It seemed that most of the audience agreed the camp idea. I think this is a great idea to have an Arabic camp. The camp is best used in student's summer vacation, spring break, winter break, etc. In conclusions the ideas shared at this meeting really shows that the Arabic language teaching methods can be modernized so it may suit students better.
